

Ambulance Services

Ridgeview provides exceptional emergency care and ambulance services, supported by on-site diagnostic imaging, dedicated stabilization/trauma bays, a helicopter pad, and surgical and critical care specialists.

Here's a look at your generosity in action:

ADDING TO OUR FLEET

We replace our ambulances when the engines reach 200,000 miles, meaning we replace approximately three vehicles per year.

TECHNOLOGICAL ADVANCES

We continue to enhance the technology in our fleet, including cardiac monitors, improved workstations, track seating and added geolocation for real-time reporting.

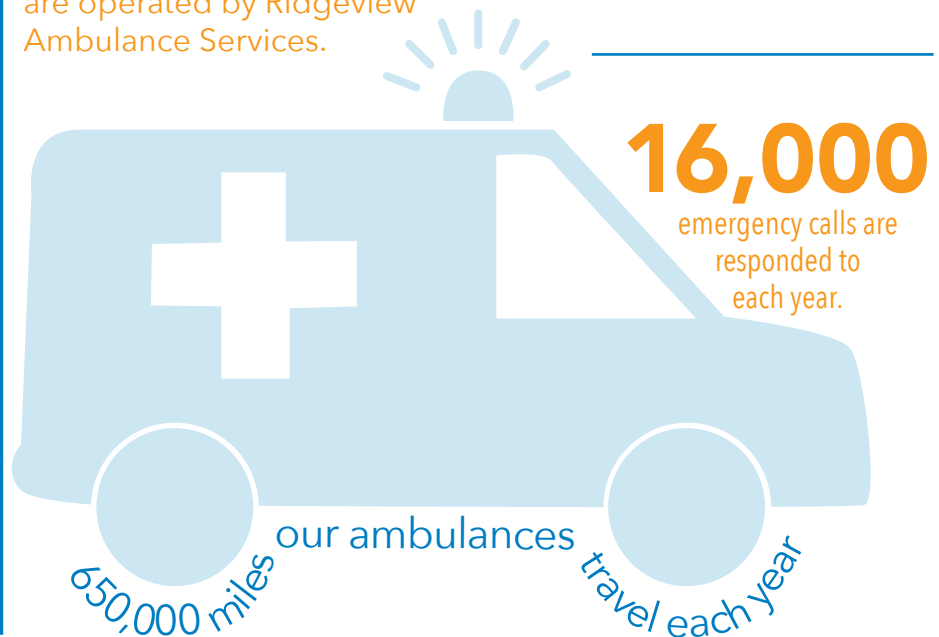

SAFETY TRANSPORT

Our ambulances offer enhancements that ensure our employees and patients have a safe, comfortable ride. This includes extended cabs, liquid spring suspension and crew safety seats.

18 ambulance & 2 sport-utility vehicles

are operated by Ridgeview Ambulance Services.

12 ambulances must be in operation each day to meet the emergency needs of our communities.

Thank You
